Results driven, analytical, and enthusiastic professional with significant experience in software design, planning, development, implementation, and maintenance. Strong background in JavaScript (es6), React/Redux, Git + GitHub, HTML5, and CSS3. Proficient in operational and unit testing. Adept at creating scalable, and efficient front-end applications that will drive optimal results to the company. Accustomed in working under extreme pressure and meeting critical deadlines. Highly adaptable with proven collaborative approach in working with cross-functional teams.

The Integer Group
Lakewood, CO

Lead UI Developer
Sept. 2019 to Nov. 2019

- Layout and execute architecture of app in a modular way, consistent with React best practices
- Used React hooks for state instead of using Redux to keep codebase minimal and lean
- Configured and deployed to multiple environments with AWS s3 buckets
- Wrote code to make the app completely responsive for all phones in mobile application
- Integrated AR technology for fun and interesting user experience
- Constantly updated codebase to be pixel-perfect with specifications and revisions with client meetings

Business Alliance Financial Services
Ruston, LA

Front End Software Engineer
July 2018 to Sept. 2019

- Execute front-end architecture
- Build a financial service application in React, Redux, and Python
- Collaborate with the team to determine operational specifications and create software requirements
- Troubleshoot design issues through root cause analysis and performed data cleanups
- Provide technical advice on bugs and enhancements
- Write code for unit testing
- Expedite work through effective project management and process improvement initiatives
- Create and maintain front-end standard documents
- Monitor the performance of the software; propose modifications and enhancements as necessary

Denver Outfitters
Golden, CO

WordPress Admin & Marketing Specialist
Feb. 2017 to Sept. 2017

-Responsible for design and content as WordPress admin for denveroutfitters.com and other sites
-Integrated a Content Management System for denveroutfitters.com and other sites
-Optimized SEO readability
-Used Google Analytics to collect user demographic information
-As a Marketing Specialist, conceived, recorded and produced bi-monthly podcast

Turing School of Software & Design
Nov. 2017 to June 2018

Front End Curriculum
I enrolled at Turing to further deepen my knowledge of JavaScript and software developer, specifically with a focus of learning React to make engaging experiences for the user. Intensive 7 month program.
